

Piston Cooling Nozzle for Detroit Diesel Series 60[®] diesel engines.

Nu-Line Heavy Duty is pleased to announce the availability of piston cooling nozzle 123528493 for Detroit Diesel Series 60 Engine applications.

Piston cooling nozzles play an important role in cylinder kit life and performance. Premature cooling nozzle failure may result in catastrophic engine damage. Piston cooling nozzles should be stocked separately, even though they are included in all Nu-line overhaul kits assembled after March 1, 2009.

Don't take chances with your customer's engine. Be sure to include these important parts in your next Nu-line stocking order.
